

## Bilge Pump Monitor

4-3/4" x 3-7/8"

This Bilge Alarm is the ultimate in monitoring the bilge area. It lights the Red Light when the bilge pump comes on and then activates a panel mounted, loud buzzer when the bilge pump runs longer than two minutes.....indicating excessive pumping (when used with the Aqualarm Smart Bilge Pump Switch, #20038). Each time the pump cycles the built-in Bilge Pump Counter counts and accumulates the frequency of pumping.

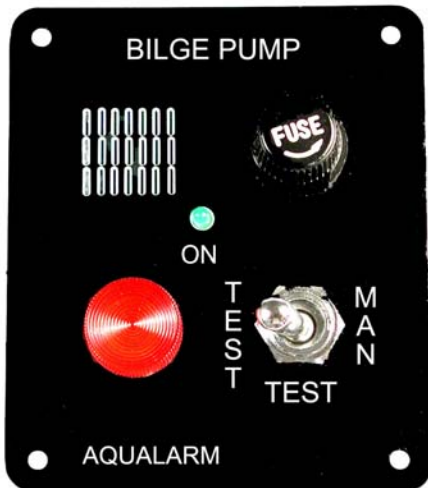

This Bilge Alarm can also be used with any bilge pump switch. The Red Light and Buzzer are both activated when the bilge pump comes on and the Bilge Pump Counter counts the cycle.

The Bilge Alarm comes with a green ON light to assure you there is power to the panel, a fuse holder for safety, and an AUTO/OFF/MAN switch for controlling the pump.

A micro processor and printed circuit is used in this and many of Aqualarm's boat electronic products for reliability and timing accuracy.

**20043** 12 volt      **20046** 24 volt      **20047** 32 volt

## Bilge Pump Alarm

3-1/2" x 3"

This Bilge Alarm monitors the bilge area by lighting the Red Light when the bilge pump comes on and then activates a panel mounted, loud buzzer when the bilge pump runs longer than two minutes.....indicating excessive pumping (when used with the Aqualarm Smart Bilge Pump Switch, #20038)

This Bilge Alarm can also be used with any bilge pump switch. The Red Light and Buzzer are both activated when the bilge pump comes on.

The Bilge Alarm comes with a green ON light to assure you there is power to the panel, a fuse holder for safety, and an AUTO/OFF/MAN switch for controlling the pump.

**20042** 12 volt    **20057** 24 volt    **20058** 32 volt

## Bilge Pump Counter

3" x 2-1/2"

- Electronically counts number of times bilge pump switches
- Bright LED digital readout with RESET
- Retains count until reset, even if power is off
- Can be used with all types of water pumps

**20045** 12, 24, 32 volt
